FootPath's Enterprise Security Group provides Security Awareness Solutions for Enterprises, Security Audits, and Information Security Architecture to Fortune-5000 companies.

Our Product SecureGURU helps reduce Internal Attacks within an Enterprise. It helps solve following business problems faced by a CIO or CSO:

- Educating Employees about all types of threats – Information, Social, Weapon Oriented; Identification of a threat, defense against threats and reporting procedures
- Evaluating Awareness Level of the Enterprise. Are 50% or above employees educated to identify, handle a Virus Attack?
- Communicating "Urgent Threat Alert" to all Employees and instantly evaluate who has not read/acknowledged the alert.
- Monitoring & Protecting the Desktop PC's against Internal attacks.

### SecureGURU™

SecureGURU provides security awareness content, content delivery technology (push and demand based pull), usage tracking, desktop monitoring and breach notification. It comes with over 20 Interactive presentations of "ready-to-use" (yet customizable) awareness themes. SecureGURU Consists of

**Monitor** – Monitors the Desktop

**Themes** – Interactive Security Awareness Content can be set up as a Screen Saver or viewed from a web browser.

**Live Update** – On Demand updates themes

**Content Advisor** – Advises Security Awareness Content

**Breach Notification** – Notifies pager of any desktop breaches

SecureGuru solution enables organizations to:

- Proactively educate employees about enterprise security to improve enterprise threat and security awareness
- Delivery of Content via Screen Saver or Browser (IE, Netscape)
- Automated refresh/add/update of Security Awareness/Product Information to every Employee via SecureGURU Live Update;
